Digital Utility Catalog

Our Grip-Tite Utility catalog provides detailed information on our full range of products, helping you make informed decisions for your projects.

Made Right. Made Here.

Grip-Tite is proud of our **American roots**. We are a family-owned company in the heart of the USA so applying the BUY America stamp of approval is at our core.

WHO WE ARE

Who has been the leading manufacturer of high-quality anchoring products since 1921? Grip-Tite Manufacturing Company.

OUR LEGACY

We can say this because we have been delivering on a promise of celebrated quality and service in the earth anchoring industry for over 100 years. We offer a full suite of products and work with key suppliers to deliver the best results for your business. It's the little things that matter and you will benefit from our unmatched experience and distinguished attention to detail that our customers depend on for all their anchoring needs.

TRUST OUR TEAM

Grip-Tite has been manufacturing utility anchors behind the scenes for decades. In 2021, we decided to take our outstanding products and service directly to the utility market. Our quality and lead-time are the best in the industry and our service is unmatched. Our focus on operational excellence ensures that you will receive the best value in the marketplace. Compare us to our competition, you'll be happy that you did.

We want you to be as informed about our products as we are.

We value honesty and transparency in everything we do and that's why we provide comprehensive information so you are able to make the purchases that are right for you and your business.

OUR HISTORY

Our history is long and versatile. We're very proud of where we started and how far we've come to provide you with the best earth anchoring products on the market.

HOW DID OUR COMPANY BEGIN?

In the 1920s and '30s, Grip-Tite® anchors were used to secure highway guard cables, then used extensively for guying oil well derricks and oil pipelines.

Following WWII, Grip-Tite® developed anchors for the rapidly growing rural electrification network of overhead lines. Since that time, Grip-Tite® has been supplying earth anchoring products for overhead electric and telephone lines, serving electric and telephone utilities coast to coast as well as internationally. Today, Grip-Tite® continues as one of the leading earth anchor manufacturers for the electric and telephone industries.

Grip-Tite® Manufacturing Co., L.L.C. of Winterset, Iowa has been manufacturing earth anchoring products for over 100 years!

WHY DO WE DO WHAT WE DO?

We strive to provide the best product, the best service, the best solution to a problem, the best answer to a question, the best way to manufacture a product, and to provide our customer the best results. We don't see our work as a means to make a living, we see it as a challenge to be the best in everything we do. We bring this mindset to every corner of the business, constantly challenging how we do things and finding ways to do them better.

CHOOSE GRIP-TITE®

It's not about what, it's about how...There's no magic in utility anchors, these products have remained largely unchanged for decades. The magic lies in how they are produced and delivered to our customers. We're different. We provide all the quality and support of a large manufacturer with the service and feel of a family-owned midwest business. Our personal values are our company values and we treat our customers like family.

HUB ANCHORS

Grip-Tite anchoring products are established solutions for your utility infrastructure and repair needs. The Power Grip line of hub anchors vary in size and strength. All Power-Grip anchors are used in combination with Hub Anchor Rods and Eye-Nuts and come painted for rust resistance.

Check out the product and parts information pages to find the best anchoring solutions for you and your business.

INSTALLATION

1.375 INCH HUB ANCHORS

Power-Grip Hub Anchors are square shaft hubs with tapped ends that are used primarily in low to mid-level capacity applications. Available in 2 shaft sizes (1-3/8" and 1-1/2"), 2 nominal tapped sizes (5/8" and 1"), as well as four different flight sizes (8", 10", 12", and 14"). Made from 1-3/8" steel square bar and 3/8" flights formed to a 3" pitch for consistent penetration. The Power-Grip Hub Anchors are used in combination with the Power-Grip Hub Anchor Rods and Eye-Nut and come painted for rust resistance. Also available in 2 flight configurations. All flights have a beveled leading edge as a standard offering.

HUB ANCHOR RODS

Power-Grip Hub Anchor Rods are steel rods that utilize two forged and threaded ends to connect Power-Grip Hub Anchors (1-3/8", 1-1/2", HD, and SHD) to the surface. Available in 2 lengths (3-1/2' and 7') and 3 different nominal rod sizes (5/8", 3/4", and 1"). Power-Grip Hub Anchor rods are used in combination with Power-Grip Hub Anchors, Power-Grip Heavy Duty Hub Anchors, Power-Grip Super Heavy Duty Hub Anchors, and Eye-Nuts and are galvanized to ASTM A123 standards. Note the thread size of the Power-Grip Hub Anchor Rod must match the thread size in the mating Power-Grip Hub Anchor.

SQUARE SHAFT ANCHORS

Power-Grip Square Shaft Anchors utilize a square shaft with welded on flights to give a higher holding capacity in looser soil. Available in 4 lengths (3', 3-1/2', 5-1/2', and 7') with various flight combinations. Made from 1-1/2" steel square bar and 3/8" flights formed to a 3" pitch for consistent penetration. The Power-Grip Square Shaft Anchors are used in combination with the Power-Grip Square Shaft Anchor Extensions and are galvanized to ASTM A123 standards.

SQUARE SHAFT ANCHOR EXTENSIONS

Power-Grip Square Shaft Anchor Extensions utilize a square shaft with a forged end to connect a Power-Grip Square Shaft Anchor to the surface. Available in 3 lengths (3-1/2', 5', and 7'). Made from 1-1/2" steel square bar. The Power-Grip Square Shaft Anchor Extensions are used in combination with the Power-Grip Square Shaft Anchors and are galvanized to ASTM A123 standards.

EXPANDING ANCHORS

Grip-Tite Expanding Anchors are used in pre-excavated holes and expand to the size of the hole, giving high holding capacity in a small unit. The eight blade, one-piece top plate, deeply embossed for additional strength, expands upon impact into undisturbed earth to form a pyramid-shaped square. The 8-way anchor retains its shape under extremely heavy loads due to the support of the eight blades by the base plate. The Grip-Tite Expanding Anchors are used in combination with the Power-Grip Forged Anchor rods and come coated in a high-grade asphalt or galvanized to ASTM A123 standards.

CROSS PLATE ANCHORS

Grip-Tite Cross Plate Anchors are used in pre-excavated holes and utilize two formed, welded plates for higher holding capacity.

Grip-Tite Cross Plate Anchors are formed from structural steel and are ribbed for extra strength and reinforcement. Plate edges are flanged to resist creeping. Plates are welded at right angles for maximum holding ability and a nut retainer is provided to aid in installation.

Grip-Tite Cross Plate Anchors are used in combination with Power-Grip Forged Anchor Rods and come either coated in a high-grade asphalt or galvanized to ASTM A123 standards.

FORGED ANCHOR RODS

SINGLE EYE FORGED ANCHOR RODS

Forged Anchor Rods come in multiple lengths (60", 72", 84", 96", 108", and 120") and guy eye sizes (Single, Double, and Triple). The rods have one forged end, with the opposite threaded end used to engage Grip-Tite Expanding Anchors and Grip-Tite Cross Plate Anchors. The Grip-Tite Forged Anchor Rods eyes are formed to prevent any damage to the guy strand. All rods are galvanized to ASTM A123 standards and are supplied with a heavy square nut and a minimum of 3-1/2' thread length.

DOUBLE EYE FORGED ANCHOR RODS

Forged Anchor Rods come in multiple lengths (60", 72", 84", 96", 108", and 120") and guy eye sizes (Single, Double, and Triple). The rods have one forged end, with the opposite threaded end used to engage Grip-Tite Expanding Anchors and Grip-Tite Cross Plate Anchors. The Grip-Tite Forged Anchor Rods eyes are formed to prevent any damage to the guy strand. All rods are galvanized to ASTM A123 standards and are supplied with a heavy square nut and a minimum of 3-1/2' thread length.

TRIPLE EYE FORGED ANCHOR RODS

Forged Anchor Rods come in multiple lengths (60", 72", 84", 96", 108", and 120") and guy eye sizes (Single, Double, and Triple). The rods have one forged end, with the opposite threaded end used to engage Grip-Tite Expanding Anchors and Grip-Tite Cross Plate Anchors. The Grip-Tite Forged Anchor Rods eyes are formed to prevent any damage to the guy strand. All rods are galvanized to ASTM A123 standards and are supplied with a heavy square nut and a minimum of 3-1/2' thread length.

POLE KEY ANCHORS

Grip-Tite Pole Key Anchors utilize multiple formed, welded plates to help stabilize misaligned poles. Grip-Tite Pole Key Anchors are formed from structural steel and are deeply ribbed for extra strength and reinforcement. The anchors expand upon impact into undisturbed soil.

WHY CHOOSE GRIP-TITE?

Utility anchors secure power delivery to hundreds of millions of Americans every day, so it's important they do their job, especially in the toughest conditions. Anchors aren't tested in mild weather, they're tested in the worst conditions, when they're needed the most. Depend on Grip-Tite anchors to secure transmission and distribution lines during high-winds and ice storms. When made in America matters because the people who make them care. Cheap anchors from overseas may do the job on most days, but our anchors are resilient and work when it matters the *most*.
